The Quality of Child's education must be measured by his behavior and Deeds but not by his Marks or Grades". We must not force the student to mug up the things. ### PARENT'S TALK

Myself Manjunathswamy B Parent of Abhinavi B a student of Shree Shivashantaveer Public School, Koppal Importance of Online Education.

'Never stop learning for when we stop learning we stop growing' Covid-19 is preventing the students and staff at many campuses from meeting face to face. Learning institutions need to develop alternative education delivery method to move the classroom online.

Studying online teachers having a common agenda between the students and teachers can also prompt both parties to accept new responsibilities and have more autonomy.

We have vast and wide internet so higher education institutions offering online versions of their program.

Online Education enables us to get the knowledge from anywhere in the world.

Through online classes each and every student can gain an education when the students are not alone to go outside due to some serious reasons then they can easily study from the online classes. There are many reasons to choose online education. 90 percent of the students today think that online education learning is the same or better than the traditional classroom experience. Every student must decide according to their needs and goals and while this alternative to traditional education is not for everyone it is still a convenient option with virtually endless option for the students all over the world.

We are very happy for the school and even for the teachers because whatever the situation is going on, Teachers did not interrupt the process of learning.

Please wear a mask, Sanitize regularly and maintain social distance
